Information about cookies

A cookie is a small text file, which is sent to your computer or mobile device when you visit a webpage on the Internet. Cookies work as a memory of the particular webpage allowing the webpage to remember your computer during the next visit, while also remembering your chosen preferences. Cookies are not used to identify you.

Cookie types

There are two types of cookies: session cookies and permanent cookies. The cookies are classified as first-party or third-party cookies. Further text explains these definitions for you to better understand the cookies and why we use them.

Session or definitely needed cookies

Session or definitely needed cookies allow us to recognize your web-browser and device, determine your internet protocol (IP) address of your device when you visit a website, as well as to remember any changes or choices made on the particular webpage to use them in other parts of the website. Session cookies are temporary – they stop functioning after the web-browser is closed or the web-site browsing session has ended.

Permanent cookies

Permanent cookies are saved on your device, which you use to browse the website. Permanent cookies are saved for a predefined period of time, which is calculated from the end of website browsing sessions. Saved cookies allow to apply the user choices or actions every time the user visits the website.

First-party cookies

First-party cookies are created by our website. These cookies can be recognized by our website domain name.

Third-party cookies

Third party cookies are created by websites that are not owned by us. Domain names of such websites are different from the domain name of our website. Third-party cookies can be saved on your device while you browse our website.
